

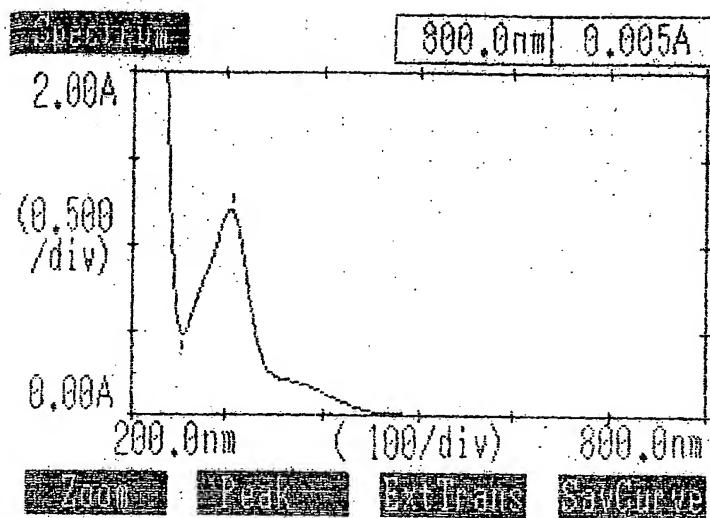

Fig. 1 Proposed mechanism of action

λ	ABS	λ	ABS
306.0	1.213		
221.0	3.215		

Detailed description: This table lists the absorbance values for two wavelengths. The first column contains the wavelength λ and the corresponding absorbance ABS. The second column contains the wavelength λ and the corresponding absorbance ABS. The values are 306.0, 1.213 and 221.0, 3.215. Below the table are four small, square grayscale images arranged horizontally, which are likely reference or calibration images for the spectrometer.
